SUBSTANCE OF INTERVIEW

On October 24, 2006, Applicants' representative, Ronald Schoenbaum, conducted a telephone interview with Examiner Burgess to discuss the outstanding Office Action. During the interview, Mr. Schoenbaum proposed amending Claim 1 to indicate that the events are reported to the event history server by the web server system. Mr. Schoenbaum explained that this provides an additional distinction over Hentzel and Tamir, both of which use special tracking/reporting software running on the users' computers to report the browsing events. Mr. Schoenbaum also pointed out that Tamir does not disclose a system in which the recorded events are used by the web server system to personalize web pages requested by users. No other claims or references were discussed, no exhibits were presented, and no agreement was reached.
